Attn: Reviewing Engineer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To Whom It May Concern:

The Hachiko Technologies, Dog Collar Sensor, HC1, FCC ID: 2ACPXDIAMOND, and label are so small that it cannot include the statement specified in FCC Part 15 Sub-part A, Section 15.19 (a) (3)

"This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

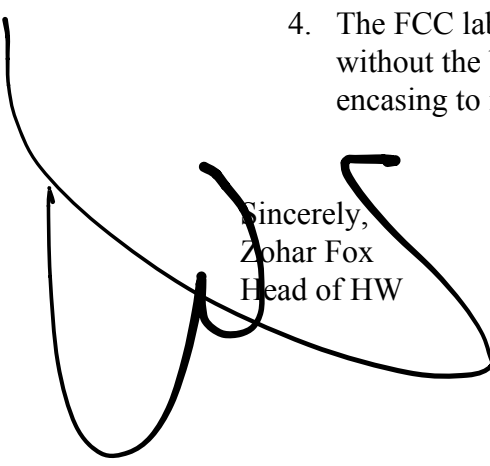

- (1) This device may not cause harmful interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation."

Due to this reason, we are using the provisions of Part 15 Subpart A, Section 15.19 (a) (5) and this statement appears in a prominent location in the user manual.

In addition, the FCC ID label's placement on the PCB board is justified based on the following reasons:

1. The EUT consists of a PCB board in a removable cloth encasing which is then attached to a dog's collar. The dog collar is not provided by Hachiko Technologies.
2. The label cannot be placed on the cloth encasing since:
 - a. the label will not adhere to the fabric;
 - b. the cloth encasing can be separated from the PCB board and then there won't be any FCC ID on the PCB board.
3. Per FCC Rule 2.95 (d) the FCC ID will be readily viewable on the PCB board since the user has to access the PCB to change the batteries.
4. The FCC label will be readily viewable at the time of purchase since it will be marketed without the battery installed and the user will have to remove the PCB board from the cloth encasing to insert the battery.

Sincerely,
Zohar Fox
Head of HW
